THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE
OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTION 793
AND 794 OF THE U. S. CODE. AN ASSAULT, ITS TRANSMISSION OR REVEL-
ATION OF ITS CONTENTS TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

A tower 65 meters high is situated on the top of the Krahenberge, which is about 2.5 kilometers south of Rheinsberg, Kreis Neuruppin. A steel mast has recently been built on top of the tower, and some sort of technical work has been completed inside the tower. It is possible that this steel mast is intended for use with an ultrashort wave transmitter inside the tower which may be connected to the long distance cable net. The local population believes that the mast is part of a new and powerful jamming station, since in the three weeks preceding 13 January 1954 the disturbance of RIAS reception in the Zechlin-Fuerstenberg/Neuruppin area increased considerably.
